

Blood and Lymph

1. Given below are two statements: (2022)

Statement I: The coagulum is formed of network of threads called thrombins

Statement II: Spleen is the graveyard of erythrocytes

In the light of the above statements, choose the most appropriate answer:

- Statement I is incorrect but Statement II is correct
- Both Statement I and Statement II are correct
- Both statement I and statement II are incorrect
- Statement I is correct but Statement II is incorrect

2. Which enzyme is responsible for the conversion of inactive fibrinogens to fibrins? (2021)

- Renin
- Epinephrine
- Thrombokinas
- Thrombin

3. Persons with 'AB' blood group are called as "Universal recipients". This is due to: (2021)

- Absence of antigens A and B in plasma
- Presence of antibodies, anti-A and anti-B, on RBCs
- Absence of antibodies, anti-A and anti-B, in plasma
- Absence of antigens A and B on the surface of RBCs

4. Match the following columns and select the correct option (2020)

Column-I	Column-II
1. Eosinophils	(i) Immune response
2. Basophils	(ii) Phagocytosis
3. Neutrophils	(iii) Release destructive enzymes
4. Lymphocytes	(iv) Release granules with histamine
a. (iv) (i) (ii) (iii) b. (i) (ii) (iv) (iii) c. (ii) (i) (iii) (iv) d. (iii) (iv) (ii) (i)	

5. Which of the following conditions cause erythroblastosis foetalis? (2020-Covid)

- Mother Rh-ve and foetus Rh+ve
- Both mother and foetus Rh-ve
- Both mother and foetus Rh+ve
- Mother Rh+ve and foetus Rh-ve

6. Match the items given in Column-I with those in Column-II and select the correct option given below (2018)

Column-I	Column-II
A. Fibrinogen	i. Osmotic balance
B. Globulin	ii. Blood clotting
C. Albumin	iii. Defence mechanism
a. A-iii B-ii C-i b. A-i B-ii C-iii c. A-i B-iii C-ii d. A-ii B-iii C-i	

7. Adult human RBCs are enucleate. Which of the following statement(s) is/are most appropriate explanation for this feature? (2017-Delhi)

- They do not need to reproduce,
 - They are somatic cells,
 - They do not metabolise,
 - All their internal space is available for oxygen transport
- Only (D)
 - Only (A)
 - (A), (C) and (D)
 - (B) and (C)

8. Serum differs from blood in: (2016 - II)

- Lacking clotting factors
- Lacking antibodies
- Lacking globulins
- Lacking albumins

9. Name the blood cells, whose reduction in number can cause clotting disorder, leading to excessive loss of blood from the body. (2016 - II)

- Neutrophils
- Thrombocytes
- Erythrocytes
- Leukocytes

10. Which one of the following is correct? (2015)

- Lymph = Plasma + RBC + WBC
- Blood = Plasma + RBC + WBC + Platelets
- Plasma = Blood – Lymphocytes
- Serum = Blood + Fibrinogen

11. Erythropoiesis starts in: (2015)

- Spleen
- Red bone marrow
- Kidney
- Liver

Body Fluids and Circulation 2

12. If you suspect major deficiency of antibodies in a person, to which of the following would you look for confirmatory evidences? (2015 Re)

- a. Serum albumins b. Haemocytes
- c. Serum globulins d. Fibrinogen in plasma

13. Person with blood group AB is considered as universal recipient because he has: (2014)

- a. Both A and B antigens in the plasma but no antibodies
- b. Both A and B antigens on RBC but no antibodies in the plasma
- c. Both A and B antibodies in the plasma
- d. No antigen on RBC and no antibody in the plasma

14. The most abundant intracellular cation is: [OS] (2013)

- a. K⁺ b. Na⁺ c. Ca⁺⁺ d. H⁺

Circulatory Pathways

15. Which one of the following statements is correct? (2022)

- a. Increased ventricular pressure closes semilunar valves
- b. The AVN generates action potential for atrial contraction
- c. Tricuspid and bicuspid valves open by atrial contraction
- d. Blood moves freely from atrium to ventricle in joint diastole

16. The QRS complex in a standard ECG represents: (2020)

- a. Depolarisation of auricles b. Depolarisation of ventricles
- c. Repolarisation of ventricles d. Repolarisation of auricles

17. What would be the heart rate of a person if the cardiac output is 5 L, end-diastolic volume 100 mL and end-systolic volume 50 mL? (2019)

- a. 50 bpm b. 75 bpm c. 100 bpm d. 125 bpm

18. Match the Column-I with Column-II (2019)

Column-I	Column-II
A. P - wave	i. Depolarisation of ventricles
B. QRS complex	ii. Repolarisation of ventricle
C. T - wave	iii. Coronary ischemia
D. Reduction in size of T-wave	iv. Depolarisation of atria
	v. Repolarisation of atria
a. A-iv B-i C-ii D-iii b. A-iv B-i C-ii D-v	
c. A-ii B-i C-v D-iii d. A-ii B-iii C-v D-iv	

19. Match the items given in Column-I with those in Column-II and select the correct op

Column-I	Column-II
A. Tricuspid valve	i. Between left atrium & left ventricle
B. Bicuspid valve	ii. Between right ventricle & pulmonary artery
C. Semilunar valve	iii. Between right atrium & right ventricle
a. A-iii B-i C-ii b. A-i B-iii C-ii	
c. A-i B-ii C-iii d. A-ii B-i C-iii	

20. Blood pressure in the mammalian aorta is maximum during: (2015)

- a. Systole of the left ventricle b. Diastole of the right atrium
- c. Systole of the left atrium d. Diastole of the right ventricle

21. Which one of the following animals has two separate circulatory pathways? (2015 Re)

- a. Lizard b. Whale c. Shark d. Frog

22. Doctors use stethoscope to hear the sounds produced during each cardiac cycle. The second sound is heard when: (2015 Re)

- a. Ventricular walls vibrate due to blood from atria
- b. Semilunar valves close after blood flows into vessels
- c. AV node receives signal from SA Node
- d. AV valves open up

23. The diagram given here is the standard ECG of a normal person. The P-wave represents the: (2013)

- a. End of systole b. Contraction of both the atria
- c. Initiation of ventricular contraction d. Beginning of systole

Chapter & Topicwise NEET PYQ's P 3 W

Double Circulation & Regulation of Cardiac Activity

24. Which of the following is associated with decrease in cardiac output? (2020-Covid)
- Parasympathetic neural signals
 - Pneumotaxic centre
 - Adrenal medullary hormones
 - Sympathetic nerves
25. The hepatic portal vein drains blood to liver from (2017-Delhi)
- Heart
 - Stomach
 - Kidneys
 - Intestine

Disorders of Circulatory System

26. Blood pressure in the pulmonary artery is: (2016 - I)
- Same as that in the aorta
 - More than that in the carotid
 - More than that in the pulmonary vein
 - Less than that in the vena cava

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17
a d c d a d a a b b b c b a d b c
18 19 20 21 22 23 24 25 26
a a a b b b a d c

Answer Key
